

Requirement Gathering JAD Sessions in the 21st Century

Instructor-Led, On-Site Duration 45-60 min

Overview

Decreasing time and cost to deliver information technology that the business community can use has been the goal of the information industry forever. Joint Application Development / Requirements (JAD) is a powerful option if your situation is right. Joint Requirements Planning (JRP) sessions are a specific application of the time-proven JAD concept. It is a proven technique for accelerating the early project decision-making processes. Given the state-of-the-art of information technology, how can this consensus-building approach help your project and your organization?

Target Audience

Business Managers

Subject Matter Experts

Business Systems Analysts

Anyone else interested in finding better ways to expedite the process of delivering working information technology solutions to the business community

Project Managers

Learning Objectives

Upon completion of this seminar, you will . . .

- Recognize the risks of accelerating the analysis and design phases
- Understand what JRP/JAD sessions are and what they are not
- Identify projects that are suitable JRP/JAD candidates

Outline

1 Overview of JRP/JAD Sessions

Why IT Projects Take So Long

- Current System Development Philosophies
- How Joint Application Development / Requirements Sessions Fit
- Risks and Rewards of Accelerating Your System Delivery Process

Finding a Repeatable Approach

- Phases of a JAD/JAR
- Deliverables of a JAD/JAR
- Roles in a JAD/JAR

- Skills Inventory for Successful JAD Facilitation Teams
- Is a JRP/JAD Approach Right for Your Project and Organization
- Corporate Cultures and Accelerated Approaches
- Application Audience and Project Profiles
- Critical Success Factors
- Potential Uses of JAD/JAR Sessions
- Proper Planning Prevents Poor Performance – A Blueprint for the Future
